

ACKNOWLEDGEMENTS

Foremost, I would like to express my deep sense of gratitude to my project guide **Dr.S.Muthukumaran**, Assosiate Professor, Department of Metallurgical and Materials Engineering, National Institute of Technology, Tiruchirappalli for his support and motivation throughout this project. I would also like to thank **Mr. Saran** , M.S scholar, and **Mr. Maxwell Rejil**, Ph.D scholar, Department of Metallurgical and Materials Engineering, National Institute of Technology, Tiruchirappalli, for their guidance which in turn led to the successful completion of this project.

I sincerely thank **Dr.Srinivasan Sundarrajan**, Director, National Institute of technology, Tiruchirappalli, and **Dr.S.Raman Sankaranarayanan**, Professor and Head, Department of Metallurgical and Materials Engineering, National Institute of Technology, Tiruchirappalli, for permitting me to carry out this project of research relevance in the department with comfort.

I would like to thank all the faculty of Department of Metallurgical and Materials Engineering, NITT for their encouragement and insightful comments.

Sincere thanks are extended to all my friends for their numerous ideas and useful suggestions. They provided me a warm and friendly environment for completing this work.

Finally, and most importantly, I would like to thank the almighty God, for his grace that we live, learn and flourish.

SOORAJ R

TABLE OF CONTENTS

Title	Page No.
ABSTRACT.....	iii
ACKNOWLEDGEMENTS.....	iv
TABLE OF CONTENTS.....	v
LIST OF TABLES.....	vii
LIST OF FIGURES.....	viii
ORGANIZATION OF THE THESIS.....	x
 CHAPTER 1 INTRODUCTION.....	 1
1.1 General.....	1
1.2 Solid state welding.....	1
1.3 Friction welding.....	2
1.4 Friction welding of tube to tube plate using an external tool (FWTPET).....	 2
1.5 Application of FWTPET process.....	4
1.6 Base material properties.....	5
1.6.1 Aluminium 6061-T651.....	5
1.6.2 Application of aluminium 6061 alloy.....	6
1.6.3 Titanium Grade V (TiAl6V4).....	7
1.7 Objective.....	9
1.8 Work plan.....	10
CHAPTER 2 LITERATURE REVIEW.....	11
2.1 Summary.....	11
CHAPTER 3 EXPERIMENTAL DETAILS.....	17
3.1 Materials.....	17
3.1.1 Workpiece.....	17
3.1.2 Tool.....	17

3.2	Experimental set up.....	18
3.3	Step in FWTPET.....	19
	3.3.1 Sample preparation.....	19
	3.3.2 Assembly.....	19
	3.3.3 Alignment.....	20
	3.3.4 Welding.....	20
3.4	Welding parameters.....	21
3.5	Tube profiles.....	21
3.6	Metallographic studies.....	22
3.7	Microhardness measurements.....	23
3.8	Shear test.....	23
3.9	Scanning Electron Microscopy (SEM) and Energy Dispersive X ray (EDX).....	23
3.10	X ray diffraction analysis.....	23
CHAPTER 4	RESULTS AND DISCUSSIONS.....	24
4.1	Metallographic analysis.....	24
	4.1.1 Macrostructure analysis.....	24
	4.1.2 Microstructure analysis.....	25
4.2	Microhardness.....	27
4.3	Weld strength.....	29
4.4	X-ray diffraction analysis.....	30
4.5	SEM analysis.....	31
4.6	Fractography.....	33
CHAPTER 5	CONCLUSIONS AND FUTURE SCOPE.....	35
5.1	Conclusions.....	35
5.2	Future scope.....	35

LIST OF TABLES

Table No.	Title	Page No.
3.1	Chemical composition of AA6061-T6.....	17
3.2	Chemical composition of TiAl6V4.....	17
3.3	Chemical composition of tool material.....	17
3.4	Dimension of tool used.....	18
4.1	Shear strength for different tube profile.....	29

LIST OF FIGURES

Figure No.	Title	Page No.
1.1	Friction welding process.....	2
1.2	(a)FWTPET (b)Plastic metal flow towards tube axis-clearance method.....	3
1.3	FWTPET- interference method.....	4
1.4	Application of tube to tube plate joints.....	4
1.5	Application of dissimilar FWTPET process.....	5
1.6	General characteristics and typical application of Titanium Alloys...	8
3.1	External tool.....	17
3.2	Modified milling machine for FWTPET.....	18
3.3	Sample preparation.....	19
3.4	(a) Backing block (b) Assembly of the tool, tube and plate.....	20
3.5	Schematic illustration of FWTPET process.....	20
3.6	Schematic illustration of projection given to the tube.....	21
3.7	(a) Holes (b) Slots (c) Petals.....	22
3.8	Petaling done using an oval tool.....	22
4.1	Top view of FWTPET with (a) petal (b)hole (c) slot.....	24
4.2	Macrostructure of FWTPET with (a) Hole (b) Slot (c) Petal.....	24
4.3	Microstructure of base material (a) AA6061-T651 (b) TiAl6V4.....	25
4.4	Microstructure of TiAl6V4 (a) at the interface (b) away from the interface.....	26

4.5	Change in the microstructure of TiAl6V4.....	26
4.6	Microstructure of AA6061-T651 (a) at interface (b) away from the interface.....	26
4.7	Hardness profile across the interface.....	27
4.8	Microstructure of the heat treated sample (a) Al at the top interface (b) Al at the interface (c) Ti at the interface.....	28
4.9	Hardness profile across the interface of the aged sample.....	29
4.10	Weld strength for different tube profiles.....	30
4.11	XRD plot of Ti-Al weld interface.....	30
4.12	Line scan across Ti-Al interface.....	31
4.13	EDS plot showing the composition along the line scan.....	32
4.14	SEM image at the interface along with the composition at various points.....	32
4.15	EDS pattern at zone 3.....	33
4.16	Titanium tube after shear test.....	33
4.17	SEM images of the fracture surface on the Aluminium plate.....	34

ORGANIZATION OF THE THESIS

This report is divided into following five chapters:

- Chapter 1 deals with introduction.
- Chapter 2 deals with literature review.
- Chapter 3 deals with experimental procedure.
- Chapter 4 deals with results and discussion.
- Chapter 5 deals with conclusion and future scope.
